Management Discussion and Analysis 2012 -13

OVERVIEW

The following operating and financial review is intended to convey the management's perspective on the financial condition and on the operating performance of the Company as at the end of the Financial Year 2012-13. The following discussion of the Company's financial condition and result of operations should be read in conjunction with the Company's financial statements, schedules and notes thereto and the other information included elsewhere in the Annual Report. The Company's financial statements have been prepared in compliance with the requirements of the Companies Act, 1956, guidelines issued by the Securities and Exchange Board of India (SEBI).

INDUSTRY STRUCTURE

The past year proved to be a challenge for the mining industry with apparent steel usage increasing at the slowest rate since 2009. The euro zone crisis persisted throughout 2012 and macro-economic pressures in major economies contributed significantly to the global slowdown. Lower industrial production and reduced investment in large scale infrastructure projects resulted in a marked decrease in the growth of steel demand from both the developed and emerging markets. Apparent global steel usage in 2012 had grown by only 1.2%. A modest pick-up in global steel demand is expected in 2013. Global apparent steel usage is forecasted to increase by 2.9% to 1.45 billion tonnes in 2013, following the slower-than-expected growth in 2012. Demand is likely to improve faster in emerging markets. Apparent steel use in China, the largest steel producer and consumer, is expected to grow by 3.5% in 2013 to 668.8 million tonnes following a 1.9% increase in 2012. There are trends of demand recovery in the property sector and the demand for infrastructure has also been strong since June, 2012. However, underlying demand in the EU is not expected to improve much in 2013 despite moderate restocking seen in the beginning of the year. Overall, steel demand is expected to remain weak due to the continuing economic crisis in the developed / developing countries (including India) and the structural shift in the Chinese economy.
